RURAL ELECTRIFICATION ADMINISTRATION

PROGRESS BULLETIN
GENERAL - NO. 15

OCTOBER 15, 1937
NEW ALLOTMENTS

REA today announced the following allotments:

GEORGIA 63 RABUN
J. B. McCrary,
Rabun Land and Water
Company,
25 Marietta St.,
Atlanta, Georgia

Allotment of $10,000 to apply toward the construction of 31 miles of line in Rabun County, Georgia, and Macon County, North Carolina. The borrower, the Rabun Land and Water Company, is a small private company already serving some 77 customers in this rural community. It will add $8,000 of its own funds to the Government loan to build 31 miles of line to serve 100 customers. The power is derived from the company's hydro-electric plant.

ILLINOIS 23B SANGAMON
Charles Masters, Project Supt.
Rural Electric Convenience
Cooperative Co.,
Divernon, Illinois

A partial additional allotment of $100,000 out of a total of $181,000 requested to build 181 miles of line to serve 580 customers in Sangamon, Macoupin, Montgomery, Christian Counties. The power for this project is obtained from the Springfield Municipal Plant at a wholesale rate of 1.2¢.

IOWA 9D SCOTT
Harry J. Strong, Project Supt.
Eastern Iowa Light and Power
Cooperative, Davenport,
Iowa.

A partial additional allotment of $270,000 out of a total of $388,000 requested to build 375 miles of line to serve 926 customers in Scott, Muscatine, Louisa, Cedar and Clinton Counties. Previous allotments to this borrower have totalled $479,712 for line construction and to finance wiring and plumbing installations. This project derives current from the Muscatine Municipal Plant at a rate averaging about 0.9¢. Although no agreement has been reached on the question as to the liability of rural electric lines in Iowa for costs of modernizing rural telephone lines to eliminate interference, this allotment is made because there are no telephone interference difficulties in this area.

MINNESOTA 63 SCOTT
John W. Haugh, Project Supt.
Minnesota Valley Electric
Cooperative,
Jordan, Minnesota

An additional allotment of $50,000, making a total of $187,000 available for the construction of about 163 miles of line to serve 445 customers. This additional allotment is necessary to complete the project.

MISSISSIPPI 21C Coahoma Robert F. Harrison, Project Supt., Coahoma Electric Power Assn., Clarksdale, Miss.	An additional allotment of $47,000 to build 45 miles of line to serve 210 customers in Coahoma, Quitman and Bolivar Counties. This brings the total allotted for the project to $122,000 to build 126 miles of line to serve 442 customers. This project obtains power from the Clarksdale Municipal Plant.
MISSOURI 8026W Ralls J. A. Weaver, Project Supt. Ralls County Electric Cooperative Assn., New London, Missouri.	Allotment of $10,000 to finance house wiring and plumbing installations. A total of $317,000 has been allotted for distribution lines and the project is under construction.
WASHINGTON 18B SPOKANE Glenn H. Bell, Project Supt. Inland Empire Rural Elec., Inc., 510 Ziegler Bldg., Spokane, Washington.	Partial additional allotment of $154,000 out of a total of $592,000 requested to build 530 miles of line to serve 1,093 customers in Spokane, Whitman, Stevens, Adams and Garfield Counties. In addition a previous allotment of $90,000 for a generating plant has been transferred to be used for construction of distribution lines. Because of the settlement of wholesale rate difficulties and the execution and approval of a contract with the Washington Water Power Company to provide current at wholesale for this project, it will not be necessary to build the generating plant. The entire project for which $609,000 is now available will include 993 miles and 2,563 customers.
